PROJECTS

BJJ Check-In System (Python, FastAPI, PostgreSQL)

github.com/jackdonahoe/bjjtracker

- Built and deployed a QR-based attendance system for a 30+ member club, replacing manual check-in tracking
- Developed a PostgreSQL retention dashboard to track acquisition sources and identify members inactive for 21+ days
- Prevented duplicate attendance records during concurrent check-ins using PostgreSQL upserts and database constraints
- Deployed on Railway with bcrypt-hashed admin auth and signed session cookies

Patient Management System (C++)

github.com/jackdonahoe/PatientManagementSystem

- Built a C++ system to store, search, update, and validate patient records using classes, vectors, and modular functions
- Implemented input handling, error checking, and reliable record modification features
